

CABLING INFRASTRUCTURE

United MHC has roots that are deep in the cabling industry, providing industry-standard, product certified services and offerings. From small projects spanning a few cables, to large-scale data centers, campuses, transportation, government and enterprise installations, United MHC can supply your Business, Schools with a complete solution from cabling infrastructure through network engineering and design needs, critical network equipment and “On-Request” Support Services.

Our technicians and engineers are called upon and trusted by Fortune 1000 Clients, State, Finance, K-12 and Higher Education Clients. Businesses in virtually every vertical market have and do benefit from us delivering superior cabling infrastructure, connected buildings and related services every day. These skilled, experienced and reliable United MHC resources can accommodate your business-critical technology deployments, whether it is a single site job, multi-site campus environment, national rollout, or sustained on-site contract through staff augmentation.

Planning and Design

United MHC project managers and engineers understand that cabling infrastructure exists to support networks and application systems, which in turn support business objectives and initiatives. Our vast experience with companies of all sizes and industries provides our Customers/Clients with a Service Partner who understands unique business requirements and can apply appropriate best practices.

Installation

United MHC has a 40-year history of successful cabling and infrastructure, connected buildings, wireless, security camera, access entry, A/V and POS implementations. We are installation experts. We ensure that the installation goes according to design and that the solution is scalable to your technical needs and business demands. Our proven skill and knowledge in structured cabling and network architecture ensure that your infrastructure is installed, tested, and documented to industry standards.

Our technicians are industry experts and can install whatever media type is required, from CAT 6- CAT6 A, coax, and multi-pair to fiber and wireless. Recurring training and certifications keep our installers at the cutting edge of cabling technology, capable of even the most challenging installations.

Project Management

United MHC customers are assigned a Project Manager and or Project Coordinators that supervise the entire project(s), working directly with your IT Director and assigned Team to ensure a successful implementation. In most cases, the same Project Manager and or Project Leads work on all of your requested Campus projects, building a strong relationship with you and your team and developing a full understanding of your business. United MHC Project Managers/Project leads will ensure that your project is a success, assisting you with budgetary requirements, material needs, scheduling, and personnel requirements. The delivery, testing, documentation, and certification are sealed by our quality process, 25- year cable materials warranty and pair with a Warranty on Labor/Installations.

Resources/Services

The Resources/Services component of the solution model refers to our people and their capabilities. United MHC offers skilled, trained, and certified individuals capable of performing the critical needs of your organization's IT infrastructure or specialized end-device technology. Resources and services can be supplied in the form of directly managed crews, staff augmentation, or internal displacement, allowing your own internal resources to remain focused on the business's core competencies. In addition, virtual services such as planning, design, engineering, and assessment enable United MHC to provide resources and services that apply to the entire project lifecycle.

CABLING INFRASTRUCTURE

Quality Stamp Agreement

United MHC guarantees that all aspects of our projects and services comply with industry standards. The quality stamp agreement ensures that compliance and provides feedback to technicians on their job performance.

We capture and professionally document all audits, site surveys, and designs through our in-house designers. Accurate documentation and design result in shorter and less expensive deployment engagements. We work with your facilities group to document in detail your building wiring including patch panel assignments, cable pathways, conduit, as well as our proposed cabling solution. We use industry standard applications to document network layouts, rack design, visual server layouts, data center plans, and more.

We can custom plan, design, install, and manage your infrastructure to be scalable to your technology needs, requirements and goals. Our proven skill and knowledge in structured cabling and network architecture ensure that your infrastructure is optimized whether you are upgrading existing infrastructure or deploying a new system from the ground up. United MHC Designs, Installs, Terminates, Tests, Certifies, Labels, and Documents all Cabling Projects in compliance with all Manufacturing, BICSI, ANSI, NEC, and Customer Standards (* as well as, NRC-IRC, CSA, and CEC for Canada). All cabling infrastructure system carry a 25-year warranty.

With over thirty-six years of combined experience and thousands of clients/customer successes behind us, United MHC has the technical expertise, the resources, and the manufacturing partnerships in place to provide superior cabling services. United MHC is the one stop shop for your cabling and infrastructure needs.

- ▶ Industry standard product installations
- ▶ Consulting and design
- ▶ Wireless/wireline design and optimization End
- ▶ device equipment installation
- ▶ Project management services Infrastructure
- ▶ audits and documentation Cable moves, adds,
- ▶ and changes (MAC)
- ▶ On-site sustained maintenance or dispatch

Key Partner Benefits for working with United MHC

- ▶ Strategic Wholesale Partner Relationships only, NO Direct Market Sales-End-Users.
- ▶ Customizable Field Service Solutions based on our United MHC Client/Customer requirements. Large area of coverage, providing for one of the strongest footprints in the industry.
- Labor service delivery on time, within budget and the right labor resource staffed.
- Customizable maintenance and extensive T&M- "On-Request"- Service Support across the US and Canada

Experience

- ▶ More than 40-year proven successful Partner history

CABLING INFRASTRUCTURE

Experience

- ▶ Positive cash flow for 40 consecutive years
- ▶ Successfully Servicing all vertical Markets for our Partner's-Clients/Customers Nationwide- (Carrier, Manufacture and System Integrator Partner's)
